Energy performance certificate (EPC)				
66 Victoria Road LARNE BT40 1LZ	Energy rating	Valid until: 8 September 2033		
		Certificate number: 0031-2081-1518-2007-2495		
Property type	Semi-detached house			
Total floor area		99 square metres		

Energy rating and score

This property's current energy rating is E. It has the potential to be E.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, no insulation (assumed)	Very poor
Roof	Pitched, 100 mm loft insulation	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, dual fuel (mineral and wood)	N/A

Primary energy use

The primary energy use for this property per year is 394 kilowatt hours per square metre (kWh/m2).

Additional information

Additional information about this property:

• Cavity fill is recommended

How this affects your energy bills

An average household would need to spend £3,350 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £405 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

This property produces 7.2 tonnes of CO2		
This property's potential 6.3 tonnes of CO2 production		
You could improve this property's CO2 emissions by making the suggested changes.		
This will help to protect the environment.		
These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.		
2		

Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Cavity wall insulation	£500 - £1,500	£224
2. Floor insulation (suspended floor)	£800 - £1,200	£181
3. Solar water heating	£4,000 - £6,000	£76
4. Internal or external wall insulation	£4,000 - £14,000	£481
5. Solar photovoltaic panels	£3,500 - £5,500	£657

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.
